Office Action Summary	Examiner	Art Unit			
	Charles I Boyer	1751			
The MAILING DATE of this communication app Period for Reply	pears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) Responsive to communication(s) filed on 26 Fe	ebruary 2002.				
2a) ☐ This action is FINAL . 2b) ☑ This	action is non-final.				
3) Since this application is in condition for allowar	nce except for formal matters, pro	secution as to the ments is			
closed in accordance with the practice under E	Ex parte Quayle, 1935 C.D. 11, 45	53 O.G. 213.			
Disposition of Claims					
4)⊠ Claim(s) <u>1-6</u> is/are pending in the application.					
4a) Of the above claim(s) is/are withdraw	vn from consideration.				
5) Claim(s) is/are allowed.					
6)⊠ Claim(s) <u>1-6</u> is/are rejected.					
7) Claim(s) is/are objected to.					
8) Claim(s) are subject to restriction and/or	r election requirement.				
Application Papers					
9) The specification is objected to by the Examine	r.				
10) ☐ The drawing(s) filed on is/are: a) ☐ acce	epted or b) \square objected to by the E	Examiner.			
Applicant may not request that any objection to the	drawing(s) be held in abeyance. See	37 CFR 1.85(a).			
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).					
11)☐ The oath or declaration is objected to by the Ex	aminer. Note the attached Office	Action or form PTO-152.			
Priority under 35 U.S.C. § 119		•			
12) ☐ Acknowledgment is made of a claim for foreign	priority under 35 U.S.C. § 119(a)	-(d) or (f).			
a) ☐ All b) ☐ Some * c) ☐ None of:					
1. Certified copies of the priority documents	s have been received.				
2. Certified copies of the priority documents have been received in Application No					
3. Copies of the certified copies of the priority documents have been received in this National Stage					
application from the International Bureau (PCT Rule 17.2(a)).					
* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the specific ethoxylated glycidyl ethers of the present specification, does not reasonably provide enablement for the tens of thousands of possible compounds encompassed by the formula for the compound of the present claims. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. The examiner notes that these compounds may be quaternary ammonium, primary, secondary, or tertiary amines. Furthermore, as R1 and R5 encompass a wide range of compounds, the examiner reiterates there are at least tens of thousands of compounds which may be described by the formula of the present claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/082,295

Before citing the references against the present claims, the examiner would like to state for the record that due to the inordinate breadth of the present claims, claiming such a broadly defined compound, the examiner maintains that a thorough search is impossible. As stated above, there are thousands of possible compounds which may be described by the formula of claim 1. The examiner has taken into consideration the present invention as a whole, in order to identify the closest prior art, which art is cited below. Applicants should be aware however, that there are many other references that could have been cited against the present invention. Any response from applicants to the references cited below that does not also address the fact that their claims are extremely broadly written, together with a clear statement of what applicants consider to be the novelty of their invention, would likely not be successful in rendering those claims allowable.

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmolka, US 4,490,279.

Schmolka teaches high foaming surfactants for use in bar soaps, shampoos, dishwashing detergents, etc. (see abstract).

The surfactants of the invention are amine oxide compounds which satisfy the formula of present claim 1 (col. 1, line 45). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

Application/Control Number: 10/082,295

Art Unit: 1751

5. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Schleusener, US 5,494,593.

Schleusener teaches surfactants for use in detergent compositions (see abstract).

The surfactants of the invention are amphoteric compounds which satisfy the formula of present claim 1 (col. 17, example 1). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kucharski, Polish Journal of Chemistry.

Kucharsky teaches the synethesis of compounds, one of the reactants of which satisfies the formula of present claim 1 (page 1, formula 1). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following Chemical Abstract Registration Numbers represent a small sampling from a limited search of the compounds encompassed by the formula of present claim 1.

6200-40-4	219527-85-2	76145-03-4
